Letter of recommendation for Ra'fat A. AL-msie'deen

I have had the pleasure to supervise the research work of Ra'fat A. AL-msie'deen during his PhD, which was in the domain of software engineering (software product lines).

During his research work, Ra'fat A. AL-msie'deen proposed an original approach for the reverse engineering of a feature model from the source code and some documentation of software variants. His contribution is three-fold and comprises : extraction of feature implementation (as a set of source code elements), annotation of feature implementations by names and textual description, and finally feature model building. He uses two methods from data analysis and information retrieval domains (Formal Concept Analysis and Latent Semantic Indexing) for achieving his goals and he validated the proposal on real data.

His contributions have been validated by the scientific community through publications in international conferences of the software engineering domain including IRI (Information Reuse & Integration), ICSR (International Conference on Software Reuse) and SEKE (Software Enginering and Knowledge Engineering).

He significantly improved his knowledge of the software engineering domain during the PHD and he learned Formal Concept Analysis and Latent Semantic Indexing with the purpose of applying them to software. He has many innovative ideas, and he is very motivated and enthousiastic for research. During all his stay in the laboratory, he worked very hard to achieve his objectives and demonstrated courage and tenacity. His work brought a new vision on software variability and its connections with Formal Concept Analysis to our research group.

To conclude, and because of his personal qualities, I wish him success in his projects and I hope he will find an opportunity to contribute with his expertise and experience in a post-doctoral position,

Letter of Recommendation

I have known **Mr. Ra'fat Ahmad Ali Almsie'deen (800339)** for about 1 year. He was one of my postgraduate students in the MSc Information Technology programme at Universiti Utara Malaysia (UUM) where I am currently an associate professor. I taught Mr. Ra'fat in my IT Policies and Strategies course. He is a hard-working person, intelligent, cooperative and team-oriented. He is creative, self-reliant, independent and has demonstrated leadership quality while undertaking projects during my class. He has the potential and capability in conducting research.

Mr. Ra'fat did his final MSc Project with me. He has demonstrated his potential and capability in conducting research in his project. He is highly capable of undertaking advanced and contributing original work. With regards to his English competency, Mr Ra'fat has excellent verbal and written capability.

I am pleased to highly recommend Mr. Ra'fat for work or for his PhD studies as I am confident that he will be very successful in whatever he does. Please contact me if you need more information.
Thank you.
